Type: ROUTINE INSPECTION
Date: 28-NOV-2023

2.33(b)(2) Critical

Attending veterinarian and adequate veterinary care.

In September 2023 a fully anesthetized pig undergoing a study-related surgery was given a medication to correct an increased heart rate. The dose of the corrective medication given was more than what it should have received. The pig's heart rate then dropped too much and became unstable. Attempts to stabilize the heart rate were unsuccessful and it was humanely euthanized. The incorrect dose of medication given to this pig caused the procedure to terminate early and not allow the pig to recover. Ensure that appropriate methods are in place so that medications are given to animals at the correct dose.

Note: This incident was reported to the overseeing ACUC and to OLAW by the facility and a plan of preventive measures is in place.

Correction: Ensure preventive measures are followed so that animals receive the correct dose of medication(s).

This inspection and exit interview were conducted with facility representatives.

This was an inspection of the animals and records under CALS and SMPH oversight and some records pertaining to SVM and LSVC protocols.

Additional Inspectors:

DAWN BARKSDALE, VETERINARY MEDICAL OFFICER

Prepared By: SCOTT WELCH
USDA, APHIS, Animal Care
Title: VETERINARY MEDICAL OFFICER
